

## HOW PARTICIPATION IN GOENERGY WILL BENEFIT YOUR ORGANIZATION

Each year, the organizers actively seek participant feedback through an evaluation survey and one-on-one discussions with attendees.

***Our goal is to respond to your comments and recommendations by developing a technical agenda, technical tours, and an exposition that will help you meet and even exceed your energy management goals.***

Tight travel budgets and increased work-load demands should not be a barrier to your organization's participation in what is considered the "premier energy workshop and exposition for Federal agencies."

***Investing your time to attend this event will pay off** in energy and cost savings to your organization.*

**GovEnergy participants and their organizations will strengthen their ability to save energy and money with the most current information and tools, including:**

- **Federal Energy Management Goals** – attend individual sessions to receive the latest updates on compliance with Energy Policy Act requirements and Administration polices for Federal facilities and operations.
- **Ask the Experts** – meet nationally recognized energy experts offering proven best practices advice by selecting from over 80 workshop sessions.
- **Energy-Saving Technologies** – learn about new energy technologies and management tools by attending the technical workshops and exposition.
- **It's a Networking Bonanza!** – over 1,500 participants gather in networking sessions to exchange ideas and lessons learned -

*Meet and discuss your organization's unique energy management needs with nationally recognized energy experts, facility management colleagues, utilities, equipment manufacturers, financing experts, and others.*

- **Technical and Financing Resources** – get connected to the most useful resources – experts, tools, and web sites and enhance your energy management skills.
- **Training Credits** – benefit from this year's newest feature - Educational Credits will be offered for -

*Professional Engineers  
Professional Architects  
Certified Energy Managers  
Acquisition Personnel*
